# March 2025: PPT/YPT Training Impact

---

*“One of the most impactful things I learned from the PPT/YPT training was the crucial role caregivers play in the treatment process. Having the caregivers with the right knowledge and support, they can better assist in reinforcing treatment goals, fostering a more supportive environment, and helping the client stay on track. This realization really highlighted the importance of a collaborative approach in healthcare, where caregivers, healthcare professionals, and patients work together for the best possible outcomes.”*

**-PPT/YPT Trainee Evaluation Feedback**

*“One takeaway from this training that I will use in my practice is to assist the child in seeing his/herself as a victor and not just a victim of his/her trauma.”*

**-PPT/YPT Trainee Evaluation Feedback**

*“The role-playing exercises (breakout rooms) were particularly insightful. It was great to see how the interventions/assessments could be applied in real-time, and I found myself reflecting on how these strategies could make a difference in the lives of those who experience trauma. Additionally, the trainers were incredibly skilled in adjusting their methods based on the specific needs of the individuals involved. It showed me how important it is to be flexible and observant when working with trauma survivors.”*
