- **PCIT Space, Equipment, Supplies** (One-way mirror, headset, backup setup, assessment measures)

PCIT Therapist Training

- 1 year of formal training and consultation with PCIT Trainer
 - 5-Day Basic Training
 - 2-Day Advanced Training
 - Biweekly Clinical Consultation Calls
 - 4 Clinical Video Reviews
 - 2 Graduated PCIT Cases

Guidelines

Training Requirements for Certification as a PCIT Therapist

These requirements were developed by the PCIT International Training Task Force in collaboration with the PCIT International Board of Directors. This document should be considered "dynamic" in that the training and certification requirements will evolve as new research arises in intervention, training, and dissemination. Currently, there are several formats used in training therapists to deliver PCIT effectively with adherence to its essential elements. These training requirements reflect the minimum training necessary within any of these formats to develop competence as a PCIT Therapist using the 2011 PCIT Protocol (Eyberg & Funderburk, 2011).

I. Definition

Certified PCIT Therapists are individuals who have received appropriate and sufficient PCIT training to be qualified to provide PCIT services to children and families.

II. Training Requirements for Certified PCIT Therapists.

In order to apply for certification as a PCIT therapist, therapists must document applicable graduate education, basic PCIT training, and consultation training which includes completing two cases as described below.

A. Graduate Education.

1. Have a master's degree or higher, or an international equivalent of a master's degree, in a mental health field

AND

2. Be an independently licensed mental health service provider (for example, licensed psychologist, psychiatrist, licensed marital and family therapist, licensed practicing counselor, licensed clinical social worker, etc.) or be working under the supervision of a licensed mental health service provider.

OR

1. Be a psychology doctoral student who has completed the third year of training and be conducting clinical work under the supervision of a licensed mental health service provider.
2. **Special Note Concerning Timing of Training:** Students may receive PCIT training before completion of their master's degrees. However, they cannot be certified as PCIT therapists until their master's degree is complete or until they have completed the third year of their doctoral training.

Competency and Case Tracker

	A	B	C	D	E	F	G	H	I	J	K	
1	Therapist Info	Therapist name:			Clinician Name							
2		Agency:			Clinician Organization

PCIT Backup Time Out Space Guidelines:

Shared by Cheryl McNeil

Wesley Spectrum

Time Out Chair: Chair positioned away from toys, but within play area.

Time Out Space: Area that is sectioned off (perhaps by a Dutch door) **without** a lock. This keeps a safe physical barrier between parent and child, but still **allows for the child to maintain visual contact** with the parent, ensuring no seclusion.

Time Out Space Guidelines

Stern Center Uniontown, PA

Matilda Theiss

- The use of the time out chair and time-out space is done under the guidance and monitoring of the clinician
- Parent must be visible to child at all times
- Time Limits:

Time Out Space

1 minute (with a 5 second quiet period)

Time Out Chair

3 minutes (with a 5 second quiet

Alternatives to Timeout

Back Up Space

- **Swoop-and-Go:** Parents takes toys and stands outside of room

- **Adjoining room:** Parent guides child to empty room next to PCIT play room.

Our PCIT Training Week
